

May 5, 2020,

Byron Haynes  
Copperhill Industries  
304 Ocoee Street  
Copperhill, TN 37317

Dear Mr. Haynes,

We have reviewed the request to approve the coarse aggregate of Copperhill Quarry in Copperhill, TN. I am pleased to inform you that Copperhill Quarry has successfully completed the Evaluation Process. TDOT personnel tested samples obtained from Copperhill Quarry and reviewed the site-specific Quality Control Plan. We have determined that the coarse aggregate material is satisfactory and meets TDOT specifications. As a result, Copperhill Quarry will be placed on the TDOT Producer List with the Producer Code **27000002** as has been added to the TDOT Surface Aggregate List.

This facility will be monitored by our Region 2 Materials and Tests office. In order for this source to remain approved, samples of the materials must comply with the physical properties of Section 903 of the TDOT Standard Specifications for Road and Bridge Construction dated January 1, 2015 and the field performance must remain satisfactory. Verification samples for quality testing will be taken at a minimum of once per year for coarse aggregate. Also, an updated Quality Control Plan will be required as stated in SOP 2-1: Aggregate Approval Process if any change is made.

Please contact me with any further questions or concerns.

Sincerely,

A handwritten signature in black ink, appearing to read "BKE", with a long, sweeping horizontal line extending to the right.

Brian Egan  
Director of Materials and Tests Division
